

WATER-TO-AIR PORTABLE AIR-CONDITIONER

Pinguino PAC 70 ECO

EASY TO USE

The Electronic controls monitor the room temperature and select the ideal function for the air conditioner to operate at to maintain desired room temperature.

TURBO FUNCTION

An electronic device activates the "Turbo Function" to create the most comfortable conditions in the shortest possible time.

AIR CLEANING SYSTEM

Air Cleaning System (3M Filtrete™) improves air quality by filtering particles down to 0.3 microns, reducing dust, pollen, smoke particles and dust mites.

ENVIRONMENTALLY FRIENDLY

Refrigerant used (R290) is completely CFC/HCFC and HFC free

TECHNICAL DATA

Cooling capacity		
Air function	Btu/h-W	6500-1910
Water function	Btu/h-W	9000-2640
Turbo function	Btu/h-W	9900-2900
Input power	W	700
Air flow	m³/h	200-370
Moisture removal	l/24h	24
Noise level	dB(A)	45
Water tank capacity	l	11
Suitable for room size approx.		4 x 7 m

PAC 70 ECO

- TURBO POWER BOOST: Maximum cooling power - 9900 Btu/h (2900W)
- Unique twin condenser system operates on water and air to cool the condenser, and automatically switches to air only if water runs out.
- Cooling power SUPERCOOL: it operates on water for maximum power (9000 Btu/h, 2640W); COOL: operating on air (6500 Btu/h, 1910W).
- IR remote control.
- Fan only function.
- "SLEEP" Function: the electronics monitor the air conditioner during the night to maintain the correct temperature and ensure the quietest operation.
- It dehumidifies automatically whilst air conditioning, removing up to 1L per hour of excess moisture.
- "AUTOFAN": the appliance registers the room temperature and automatically ensures the optimum speed ventilation.
- AUTO DIAGNOSIS SYSTEM.
- 3-speed ventilation + "SILENT".
- Electronic timer and room thermostat.
- High performance 3MFILTRETE™ air filter.
- Rolling castors for ease of movement
